

QUICKSTART GUIDE

ADDING *leva* AS AN ORDER SET in Athena EHR

The *leva*® Pelvic Health System can now be added as an order set in Athena® EHR. Open your AthenaNet page and follow the instructions below to add *leva* as an order set.

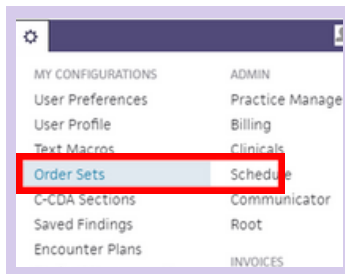

STEP 1

Click the gear icon tab on the top right of the Athena toggle bar

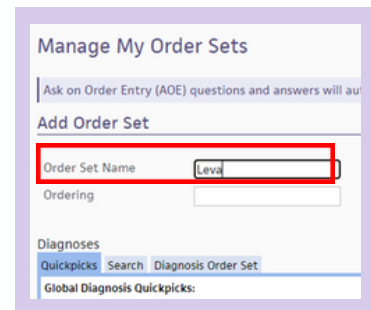

STEP 2

Click on "Order Sets" in the drop-down list under My Configurations.

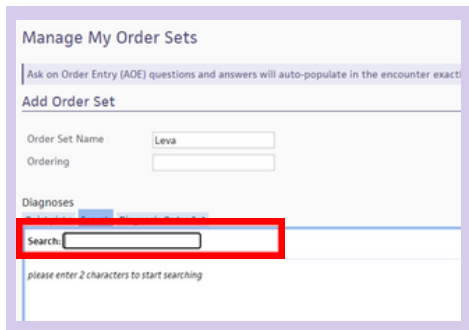

STEP 3

Name your order set

STEP 4

Click on the search tab under diagnoses and search for the diagnosis code

Indicated Codes:

- N39.3 – Stress incontinence (female)
- N39.41 – Urgency incontinence
- N39.46 – Mixed urinary incontinence
- N32.81 – Overactive bladder
- N81.84 – Pelvic floor muscle wasting

Once list is completed, click "add" at the bottom of the list

leva® is intended for strengthening pelvic floor muscles; and treatment of stress, mixed and mild to moderate urgency urinary incontinence (including overactive bladder) in women. Please talk to your doctor to see if it is right for you. Important Safety Information: Do not use *leva* while pregnant, or if you think you may be pregnant, unless authorized by your doctor. For a complete summary of risks and instructions for *leva*, see the Instructions for Use available at www.renoviainc.com. Athena is a trademark of AthenaHealth, LLC © 2022 Renovia Inc. QUICKSTART GUIDE

ADDING *leva* AS AN ORDER SET IN Athena EHR

STEP 5

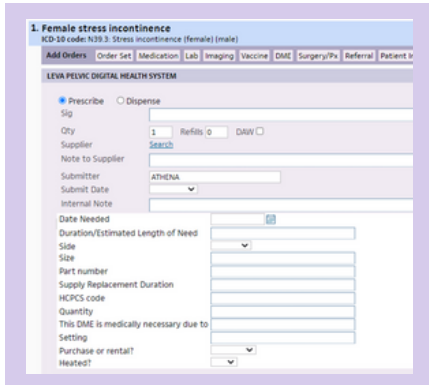

Underneath each listed diagnosis, click "DME"

Search and select "/leva pelvic digital health system" in the search bar and then click "save"

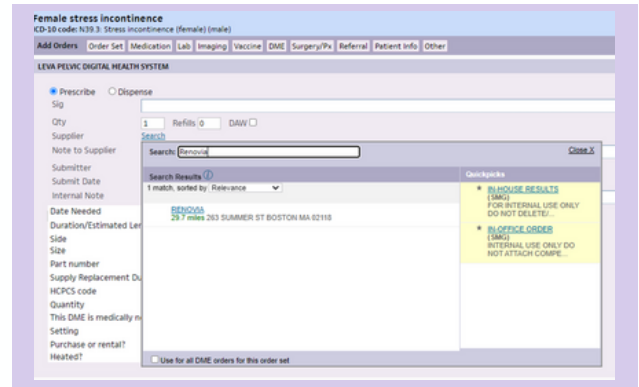

STEP 6

After "*leva* Pelvic Digital Health System" is added, click on the product name under each diagnosis to set prescribing options.

STEP 7

Click "search" and type "Renovia"

IMPORTANT: Do not set the supplier to anything other than Renovia. Your patient's *leva* Rx will only be received if the supplier is set to Renovia.

STEP 8

Repeat steps 6 and 7 until all diagnoses have been added to the "Diagnoses and Orders Detail" list and the supplier (Renovia) has been listed for all diagnoses. Then, click the "save" button at the bottom of the list. This will bring you back to "My order sets" which will look like this:

- Female stress incontinence (N39.3: Stress incontinence (female))
- Urgency incontinence (N39.41: Urgency incontinence)
- Mixed urinary incontinence (N39.46: Mixed incontinence)
- Overactive bladder (N32.81: Overactive bladder)
- Pelvic floor muscle wasting (N81.84: Pelvic floor muscle wasting)
- No Diagnosis
 - LEVA PELVIC DIGITAL HEALTH SYSTEM

IMPORTANT: After the *leva* order set is added Athena, each individual provider will need to manually add it to their order set list to access this new order set.
